# ESS | ENTERPRISE SHIPPING SYSTEM

BY QUADIENT

Empower Employees To Make Smart Shipping Choices

Shipments are no longer generated from just a mailroom. Managing shipping expenses can be daunting, especially when employees are working from many different offices and remote locations. Unchecked shipments cost money and controlling costs is challenging.

Scalable Cloud Technology

Powerful Cost Control

Flexible Design

Smart Shipping Choices Are Just A Click Away

Quadient's Enterprise Shipping System (ESS) is a one-of-a-kind cloud-based shipping application that enables users to make smart shipping choices. The functionality allows users to choose a carrier at the best price and create shipments straight from their desktop – no matter where the user is located.

Important factors such as delivery service options, service fees and rates are often not considered when packages are shipped. Without the right tools to determine the most cost effective method, employees are not aware that they have choices. Quadient's ESS solution helps employees avoid unnecessary spending, which can cost businesses 30% to 40% more per package – thousands or even millions of dollars over time.

Business Processes You Can Rely On

Running a smooth business takes the right people, the right processes and the right systems, no matter what you are managing. Having the right business rules in place can only make your job easier. One area many businesses find challenging is allocating shipping costs to the appropriate cost center, project or department. Quadient's ESS application can overcome this accounting hurdle by aligning with your accounting system and capturing transaction details so every shipment cost is allocated where you want it.

Quadient Enterprise Shipping System

**We Create the Technology
So You Don't Have To**
Complying with the industry's changing regulations can be a challenge, but non-compliance with current carrier mandated rules and rates can cost money and delay deliveries. With ESS's cloud technology, companies avoid the expense of licensing fees, installing software, the need to invest in hardware, maintenance and IT support. ESS automatically ensures customers are compliant and enforces your company's business rules – a key benefit of cloud computing. ESS is configurable, ensuring service restrictions and use of contract rates; higher cost service options are eliminated all together.

Real-Time Address Validation
Roughly 17% of all U.S. business and residential addresses change each year; incorrect address fees of $12 or more can add up quickly. Quadient's ESS application utilizes a USPS®
CASS™ Certified™ database ensuring accurate validation for each shipment by correcting and updating the recipient address book every time a shipment is made.

Easy To Use
Deploying across the enterprise has never been easier. The user interface was designed with the shipping novice in mind. A simple one-screen process allows even the occasional shipper to use with minimal effort.

About Quadient

Quadient is the driving force behind the world's most meaningful customer experiences. By focusing on four key solution areas including Customer Experience Management, Business Process Automation, Mail-related Solutions, and Parcel Locker Solutions, Quadient helps simplify the connection between people and what matters.
